

E7 Sport

Requirements for indoor sports activities

E7 SPORT CHARACTERISTICS

- Compliant with standard EN12193: sports lighting
- Efficient and comfortable lighting
- Ball proof
- Long-term solution
- Extensive range of stylish luminaires

E7 Sport

STANDARD FOR SPORTS LIGHTING

According to EN12193, sports activities are subdivided into 3 classes

- Class 1: Sport in an international context and at top level
- Class 2: Sport at regional and local competition
- Class 3: Training and recreational use

The requirements for the minimum illuminance and uniformity are different per sport and per class.

	FOOTBALL, BASKETBALL ¹ , HANDBALL, JUDO, ...		TENNIS ²		BADMINTON ² , SQUASH, TABLE TENNIS, HOCKEY ...		AEROBICS, ATHLETICS, DANCE, WALL CLIMBING ³ ...	
	E horizontal	E min/ E max	E horizontal	E min/ E max	E horizontal	E min/ E max	E horizontal	E min/ E max
Class 1	750 lux	0.7	750 lux	0.7	750 lux	0.7	500 lux	0.7
Class 2	500 lux	0.7	500 lux	0.7	500 lux	0.7	300 lux	0.6
Class 3	200 lux	0.5	300 lux	0.5	300 lux	0.7	200 lux	0.5

¹ Circle ø 4 m without luminaires above the basket
² No luminaires above the playing field
³ Values are also imposed for illuminance on the wall

LED+LENS TECHNOLOGY

The LED+LENS™ technology works with high power LEDs, allowing luminous fluxes up to 10,000 lumen per meter – ideal for spaces where you need a lot of light.

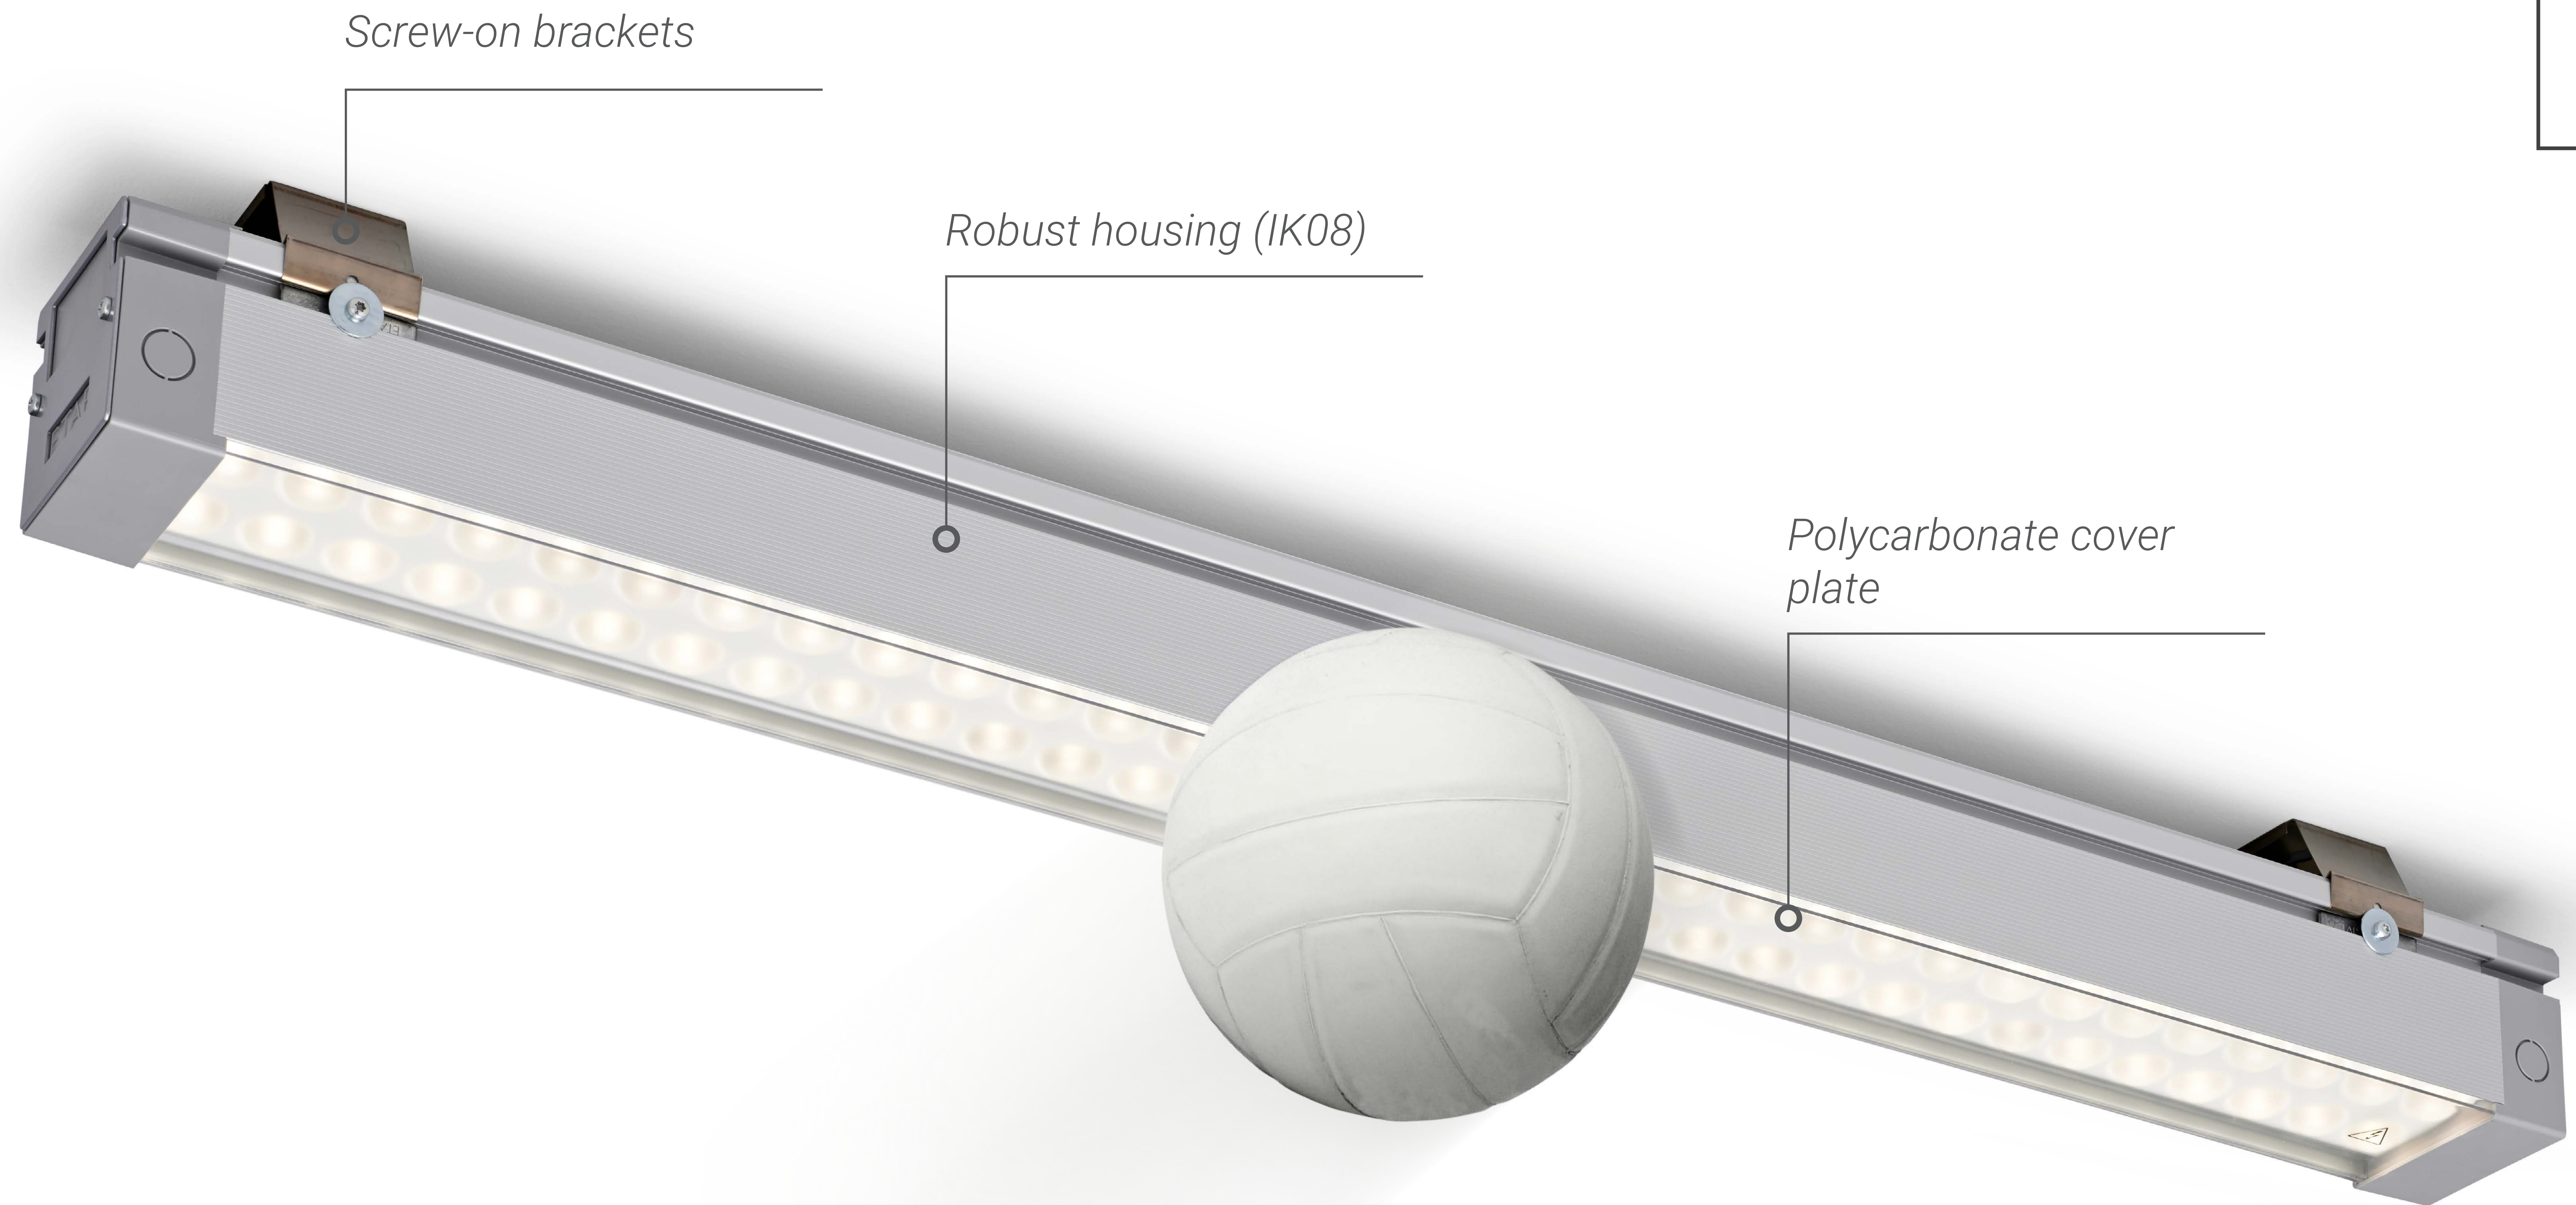

The advanced lenses in turn ensure that the bright LED light is never disruptive – an essential factor in workshops, store environments or hectic public buildings. The result is a highly specific luminous flux (up to 129 lm per watt) and maximum visual comfort ($UGR \leq 22$).

E7 sport is available with 2 light distributions:

- medium-wide beam
- wide beam

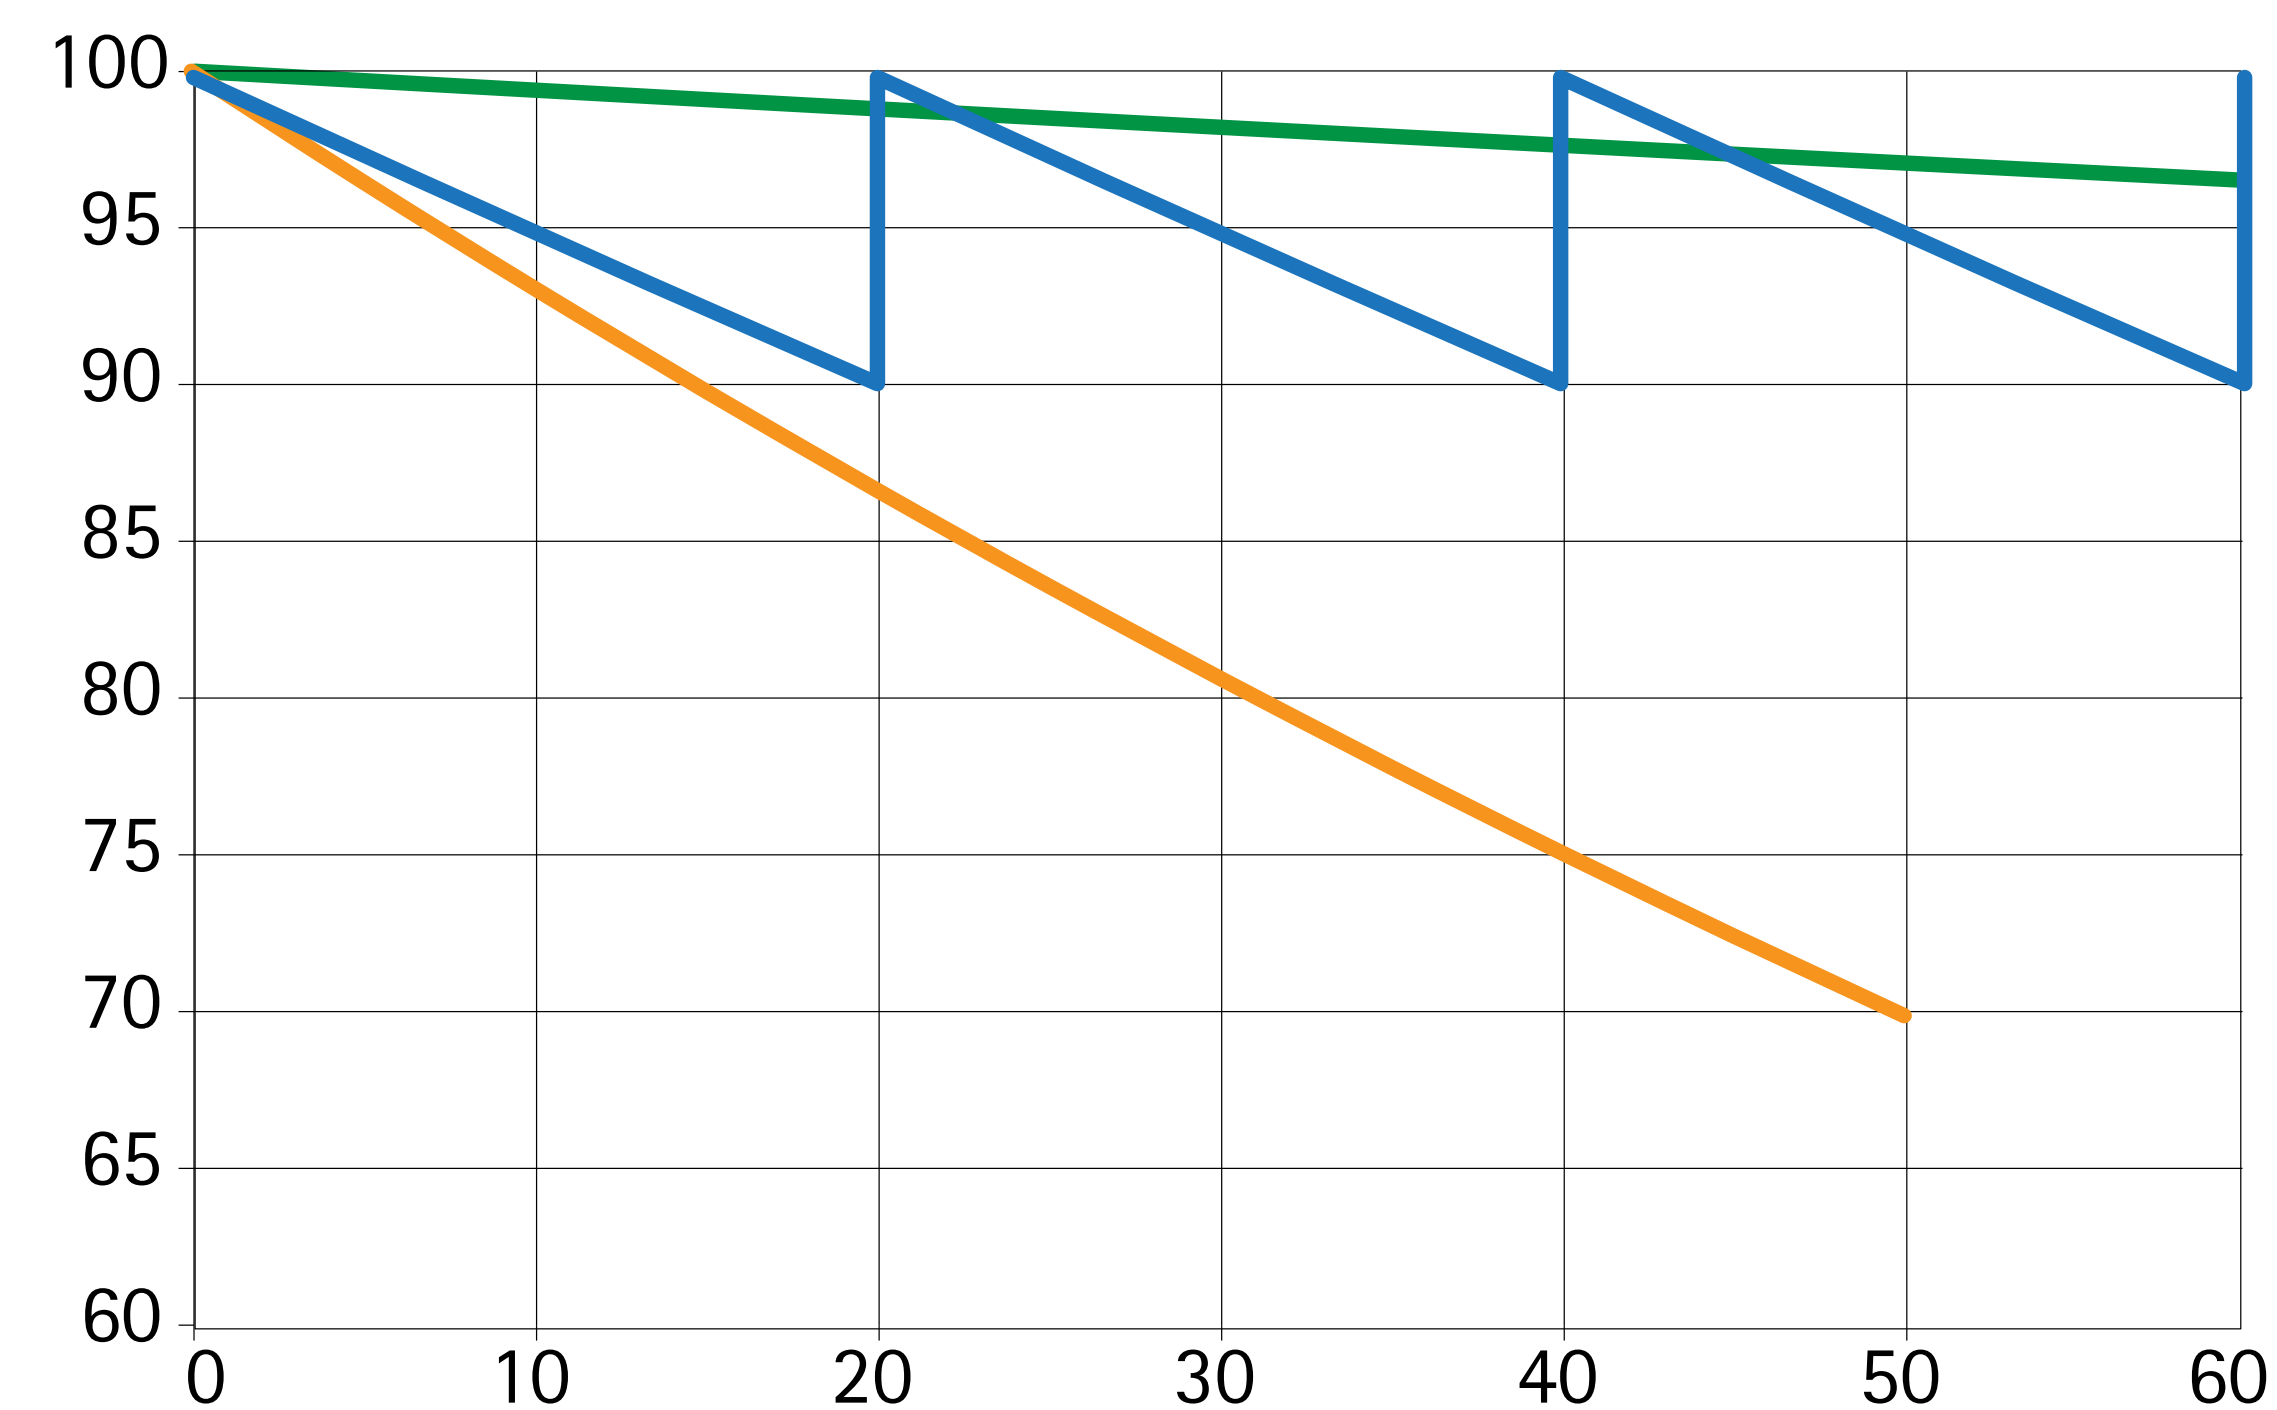

The patented surface structure softens the bright LED light.

E7 Sport is resistant to the impact of a ball. This is tested according to DIN 57710 (VDE 0710 part 13 / 5.81). In this test, which is carried out by a certified body, the luminaire is fired 36 times with a handball at 60 km / h, at different angles.

LONG SERVICE LIFE AND LOW MAINTENANCE COSTS

Thanks to the use of high-power LEDs, a qualitative driver and an optimal thermal design, E7 Sport has the highest light retention on the market.

- E7 luminaire with L97 @50.000 h (ETAP)
- LED luminaire with L70 @50.000 h
- T5 fluorescent lamp

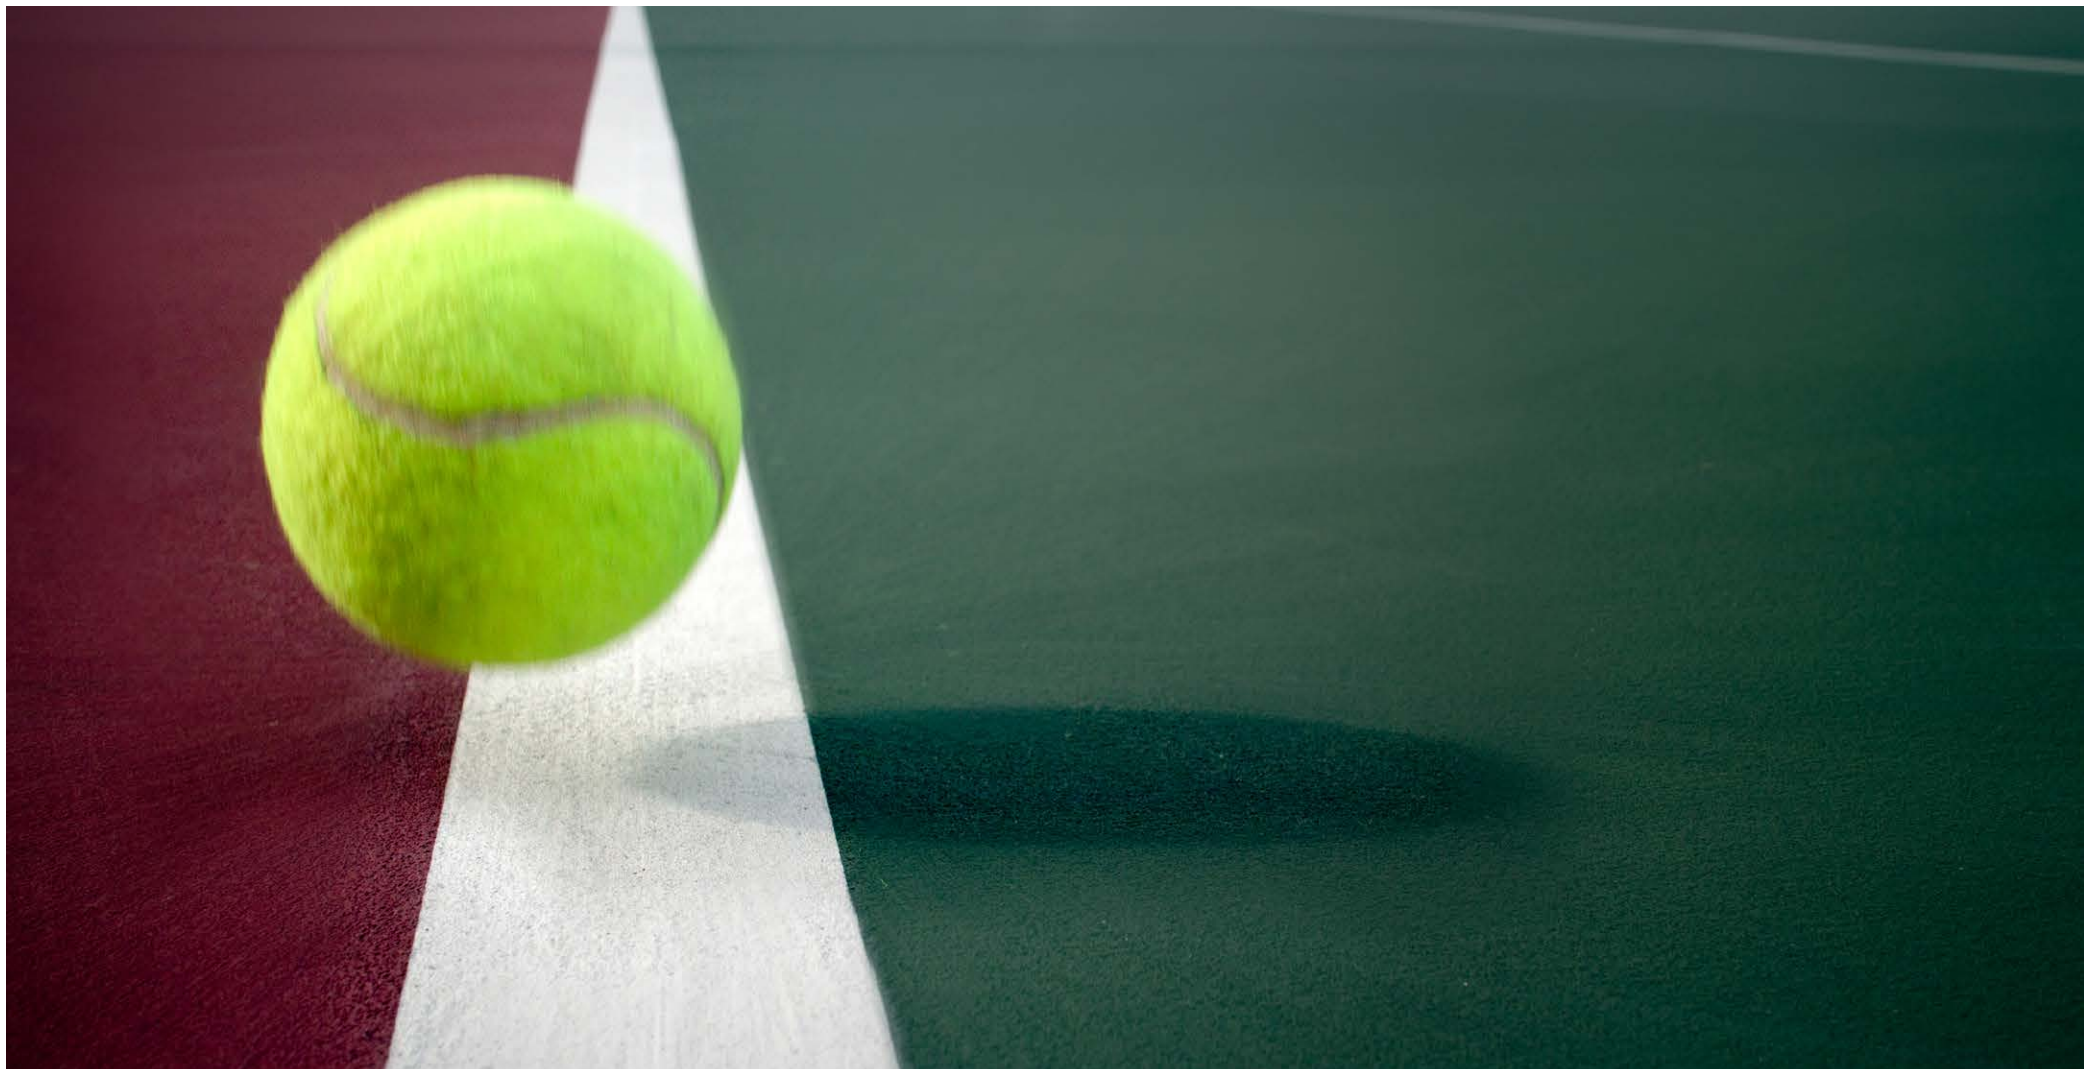

97% of the luminous flux is retained after 50,000 hours.

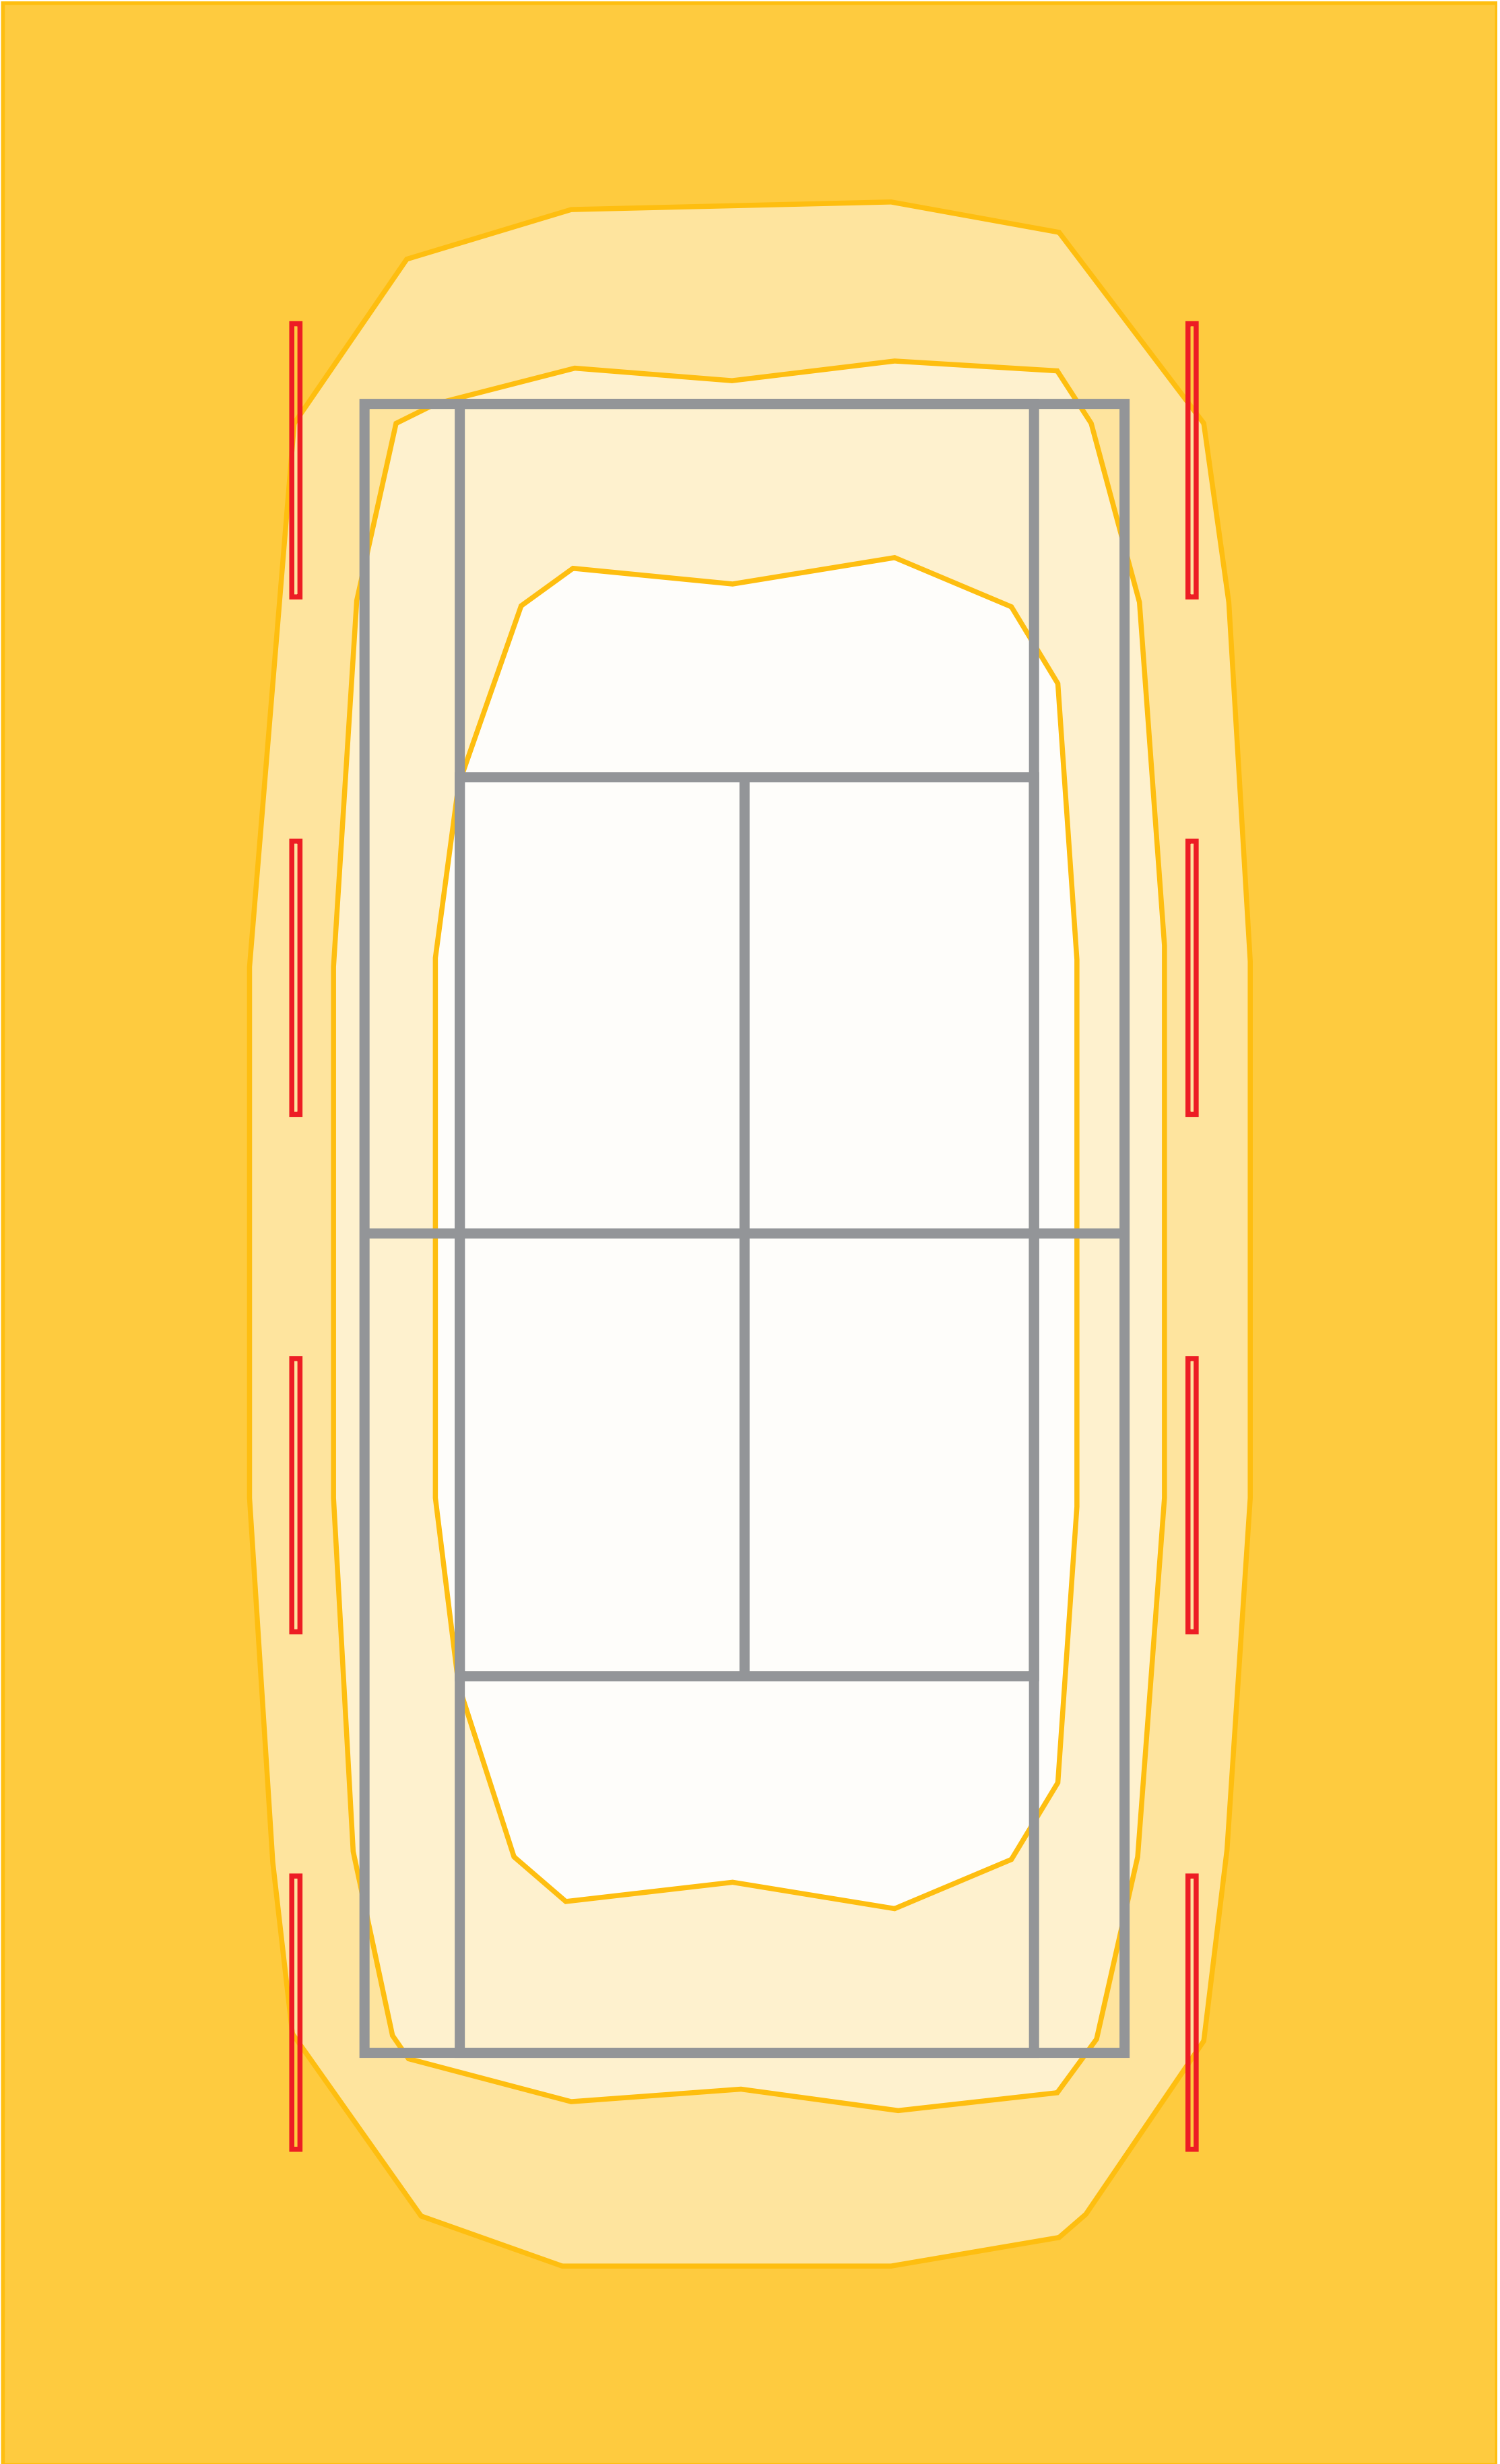

CALCULATION EXAMPLE: TENNIS COURT

Number of luminaires	8 x E7120/LED4N256400ST8 Mounted at a height of 7 m, tiltable mounting brackets
Average illuminance	534 lux
Uniformity on the playing field	0,7
Luminous flux	8 x 38.850 lumen
Installed power	2,4 kW (8 x 304 W)
Efficiency	128 lm/W
LLMF	L97 @ 50.000 h

Optimal light for a sporty game

- 500 lux
- 400lux
- 300 lux
- < 300 lux

RENOVATION SPORT COMPLEX OF BÉLIANS,
BOUGUENNAIS – FRANCE

	Before renovation	After renovation	Difference
Number of luminaires	32	35	
Average illuminance	638 lux	1041 lux	+63%
Installed power	25,6 kW	10,5 kW	-60%
Uniformity	0,62	0,72	
Specific power	3,18 W/m²/100 lux	0,97 W/m²/100 lux	-70%
Maintenance light source	every 10 000 hours	not applicable	
LLMF	L90 @ 10.000 uur	L97 @ 50.000 uur	

BEFORE

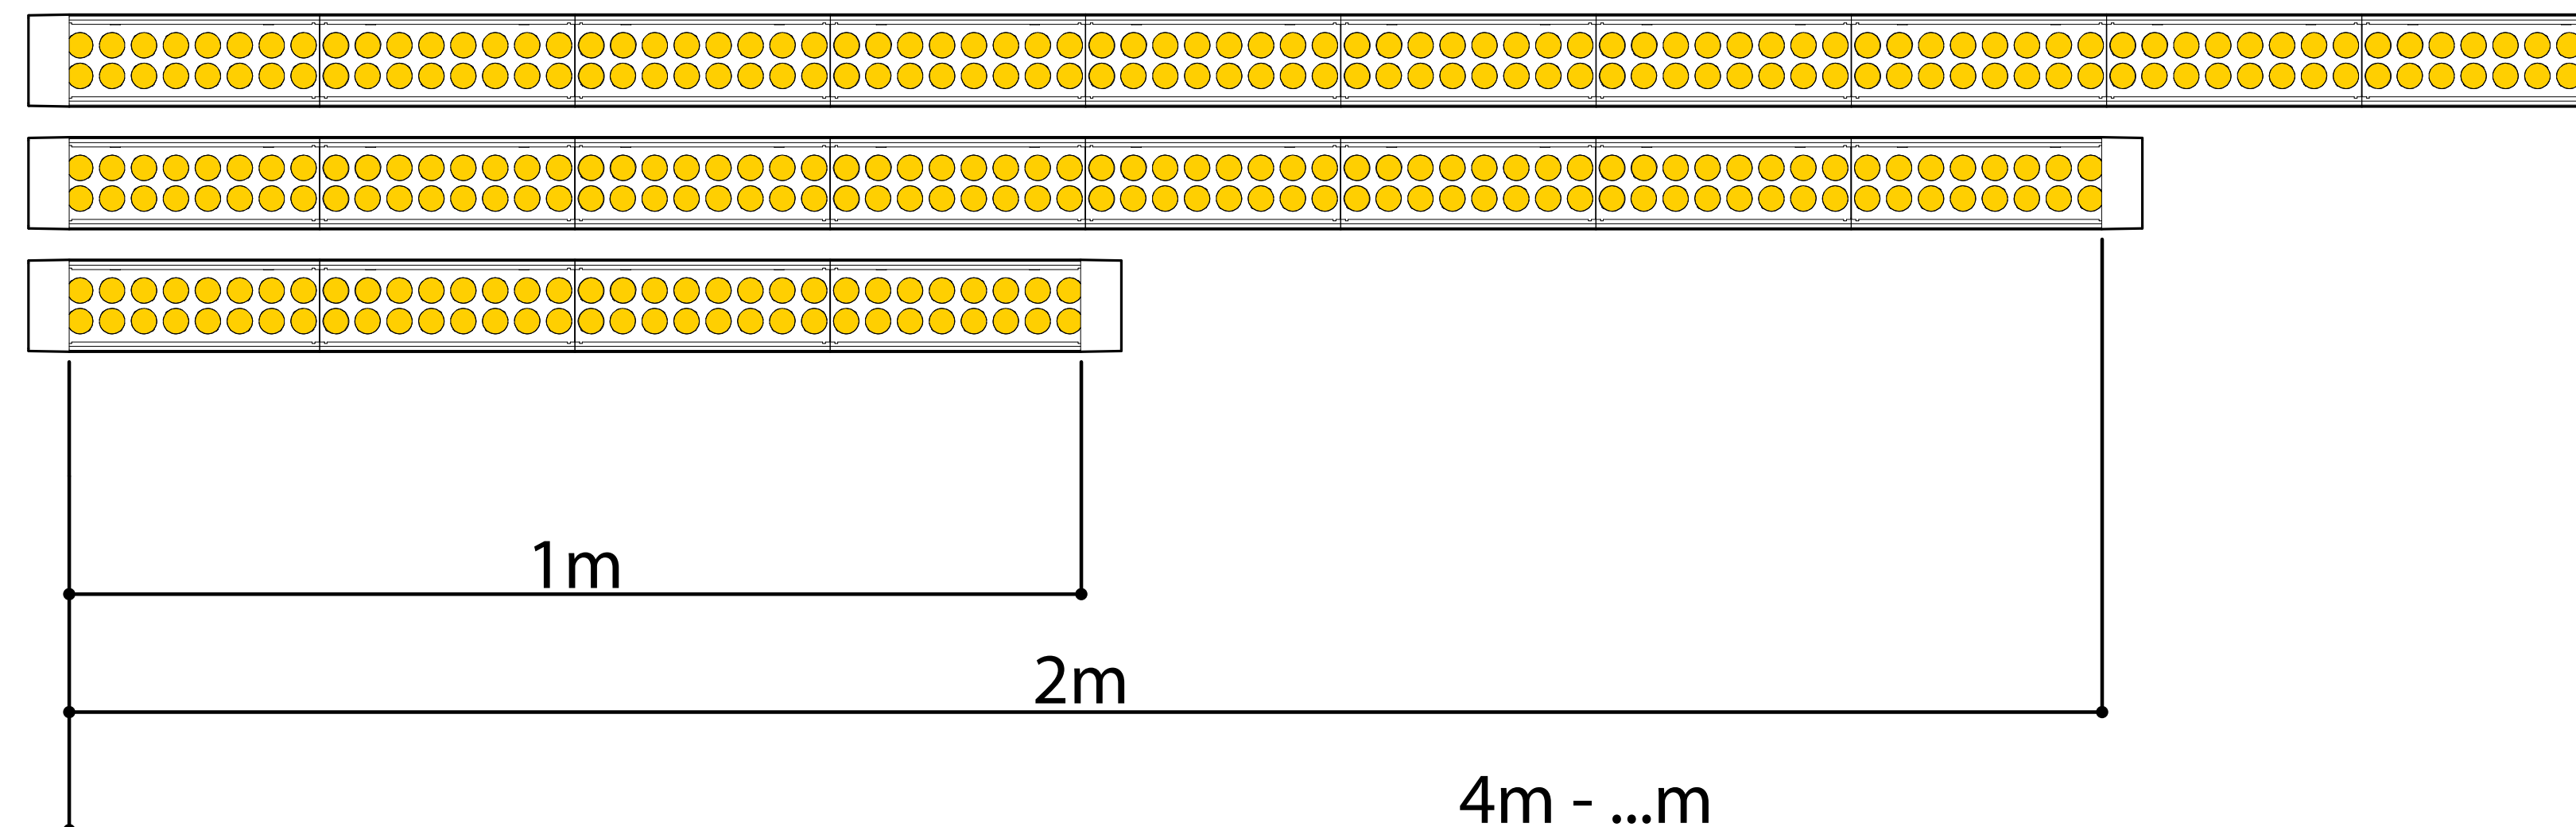

AFTER

SUITABLE FOR ALL INDOOR SPORTS ACTIVITIES

- Individual luminaires
(continuous light lines are possible provided the extra IK08 end pieces and ball proof accessories are ordered)
- Compact and stylish: suitable for any architecture

APPLICATIONS

*1.5 m and 3 m luminaires: only available as individual luminaires
1.5 m and 3 m luminaires with wide-beam lenses: $UGR \leq 25$

EASY INSTALLATION IN 4 STEPS

1. Mount the brackets

2. Hook in the luminaire

3. Connect the luminaire and snap it shut

4. Tighten the brackets

Thanks to the through-wiring, in-line luminaires can be installed easily and quickly.
